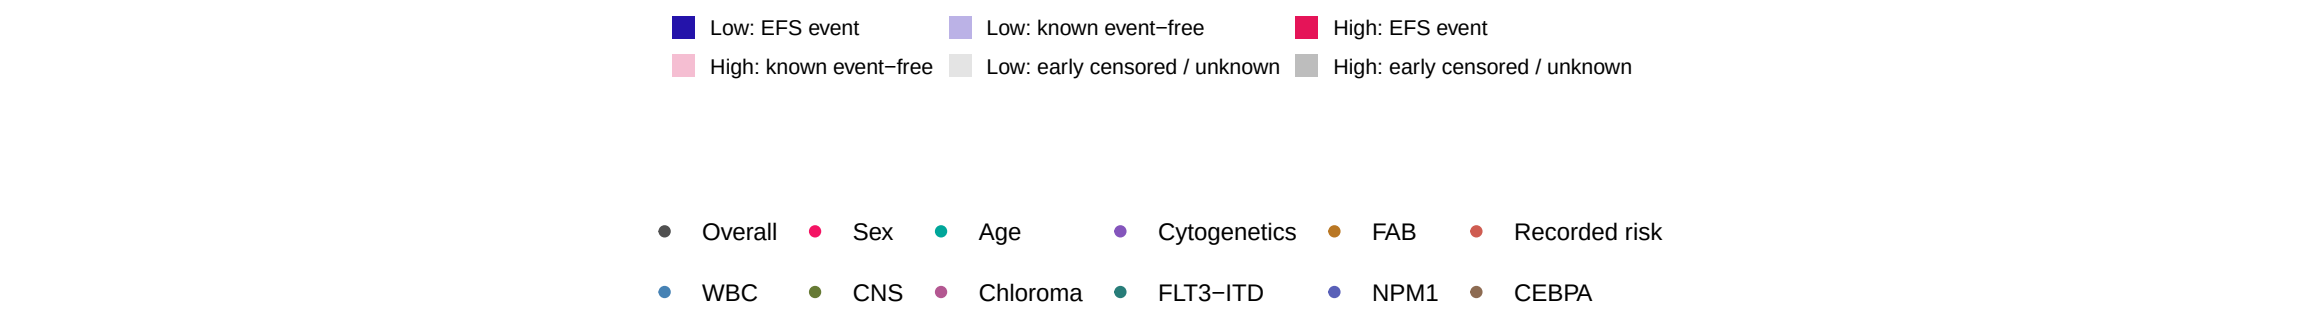
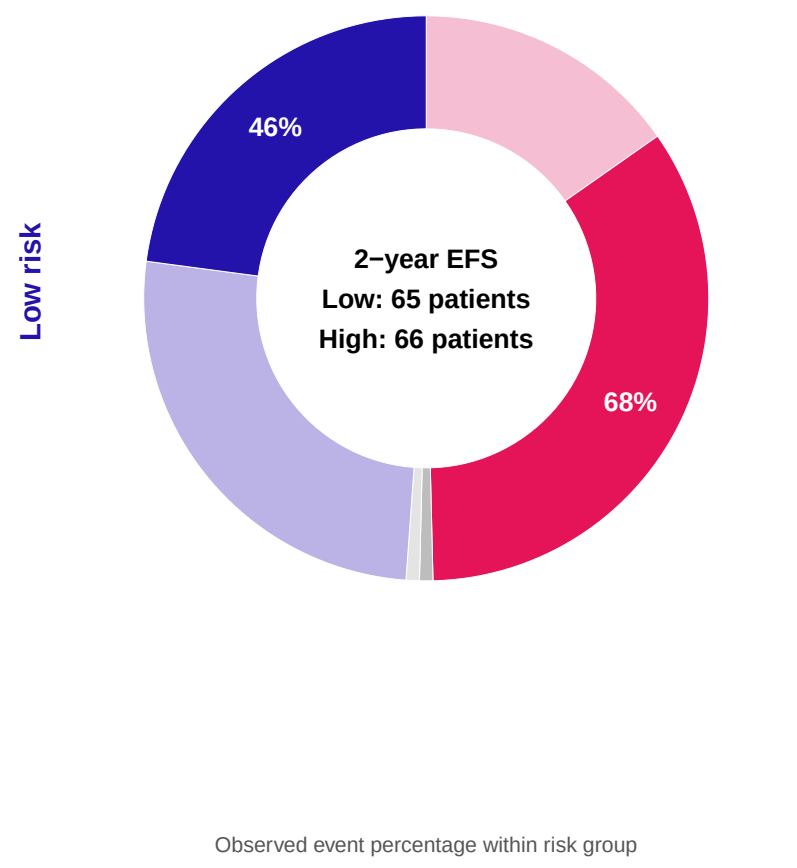
SAT−EN: EFS risk stratification in Black TARGET−AML patients

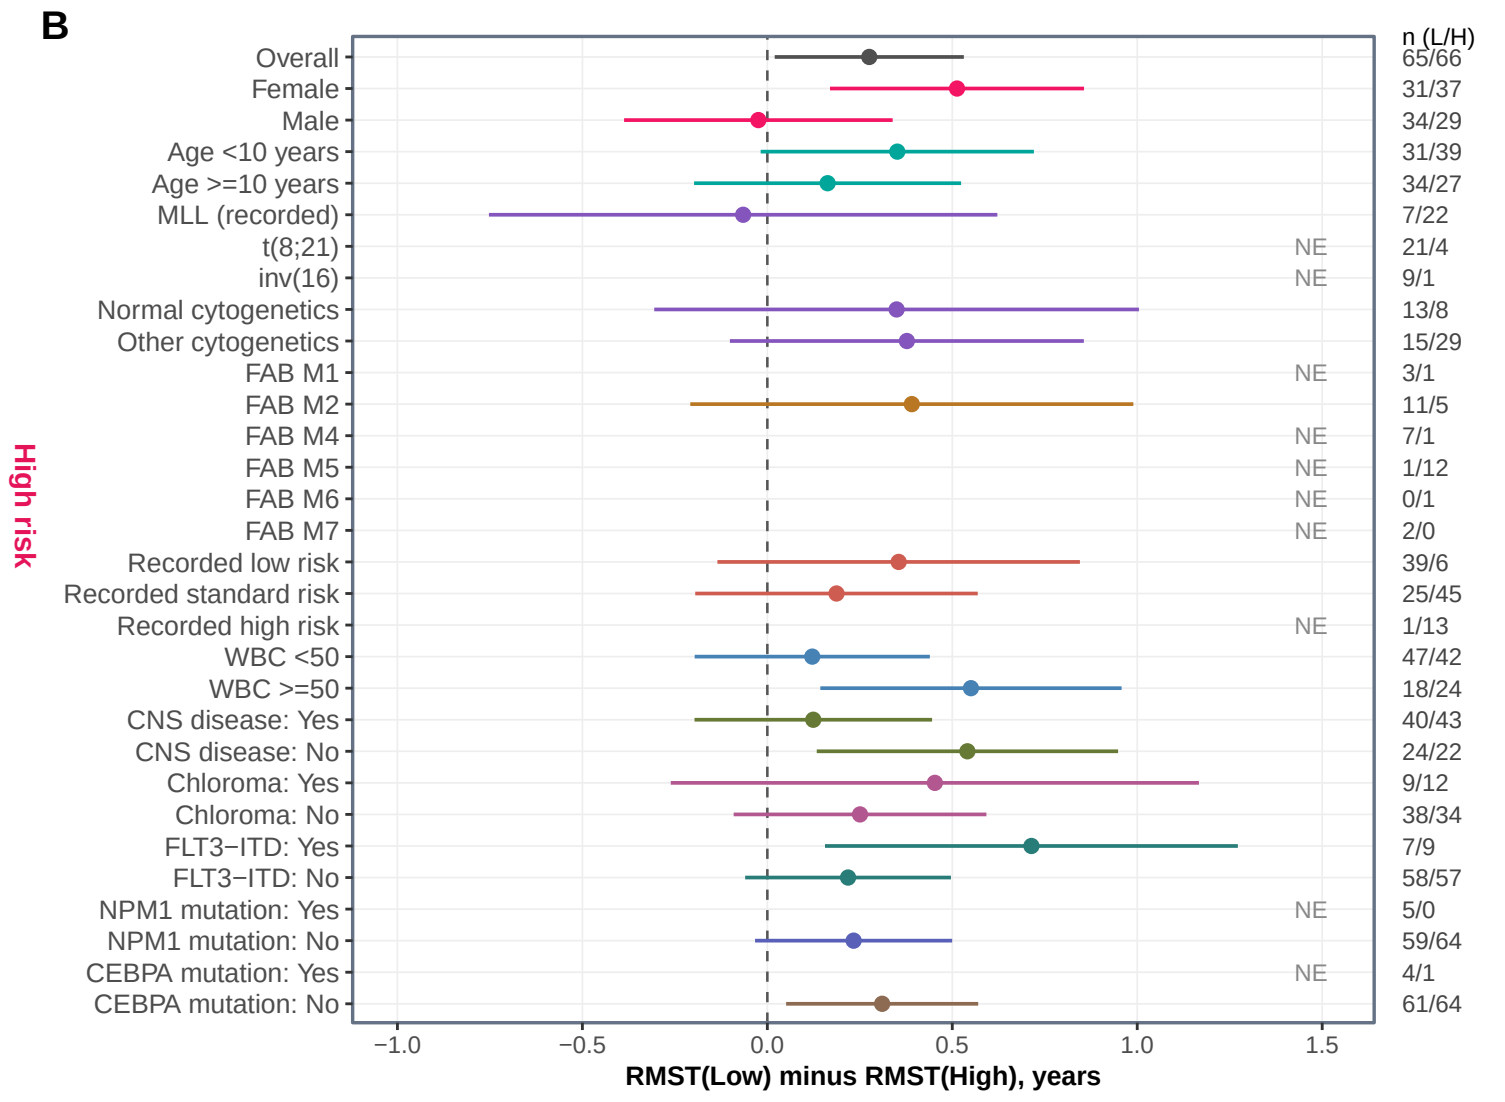


A

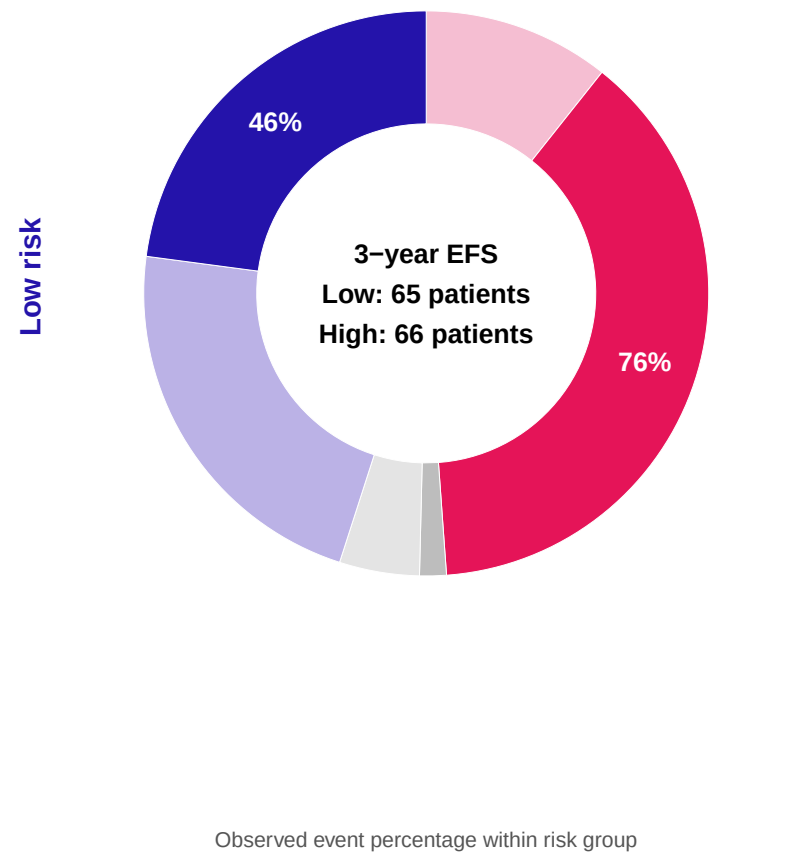


Observed event percentage within risk group

B

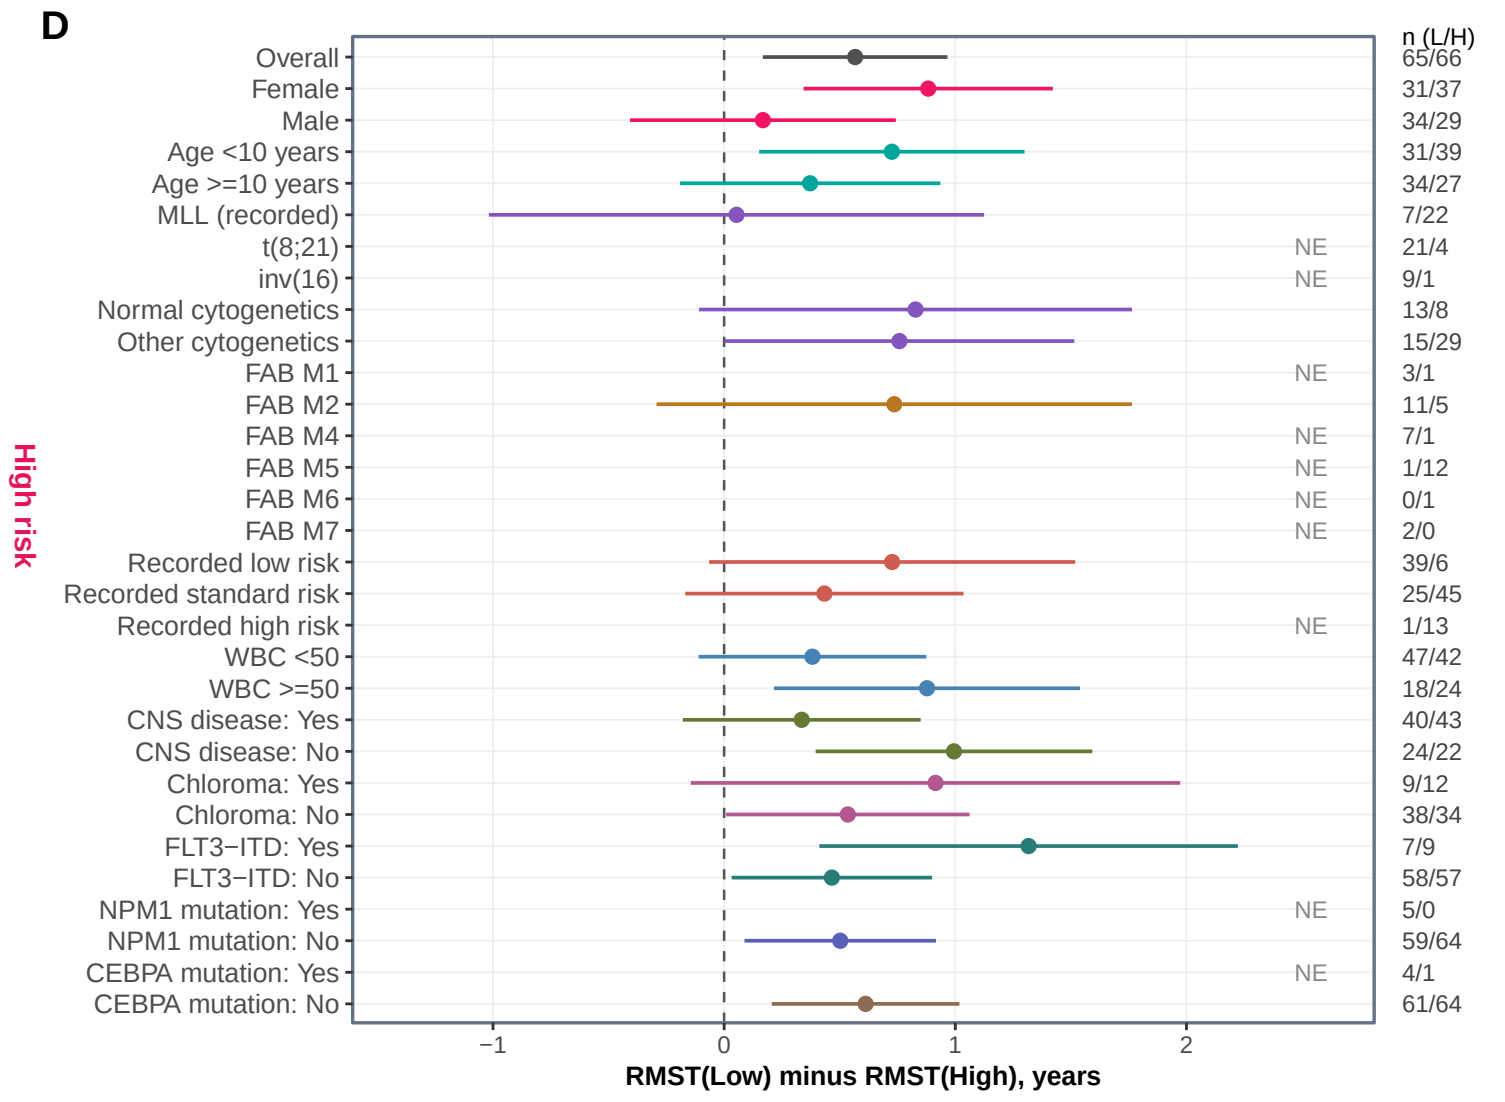


C

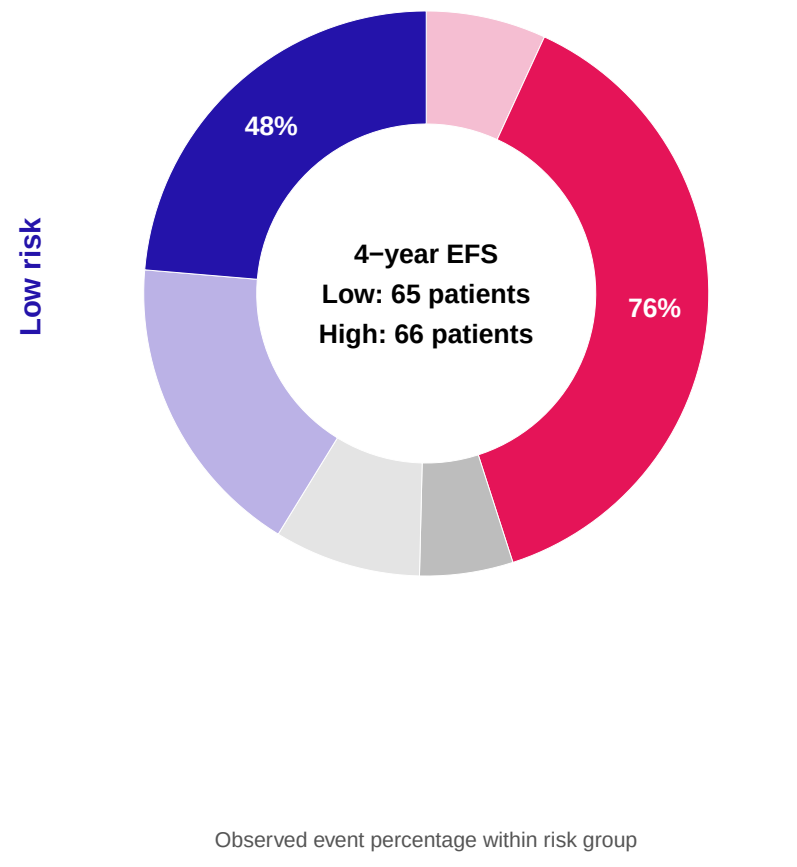


Observed event percentage within risk group

D

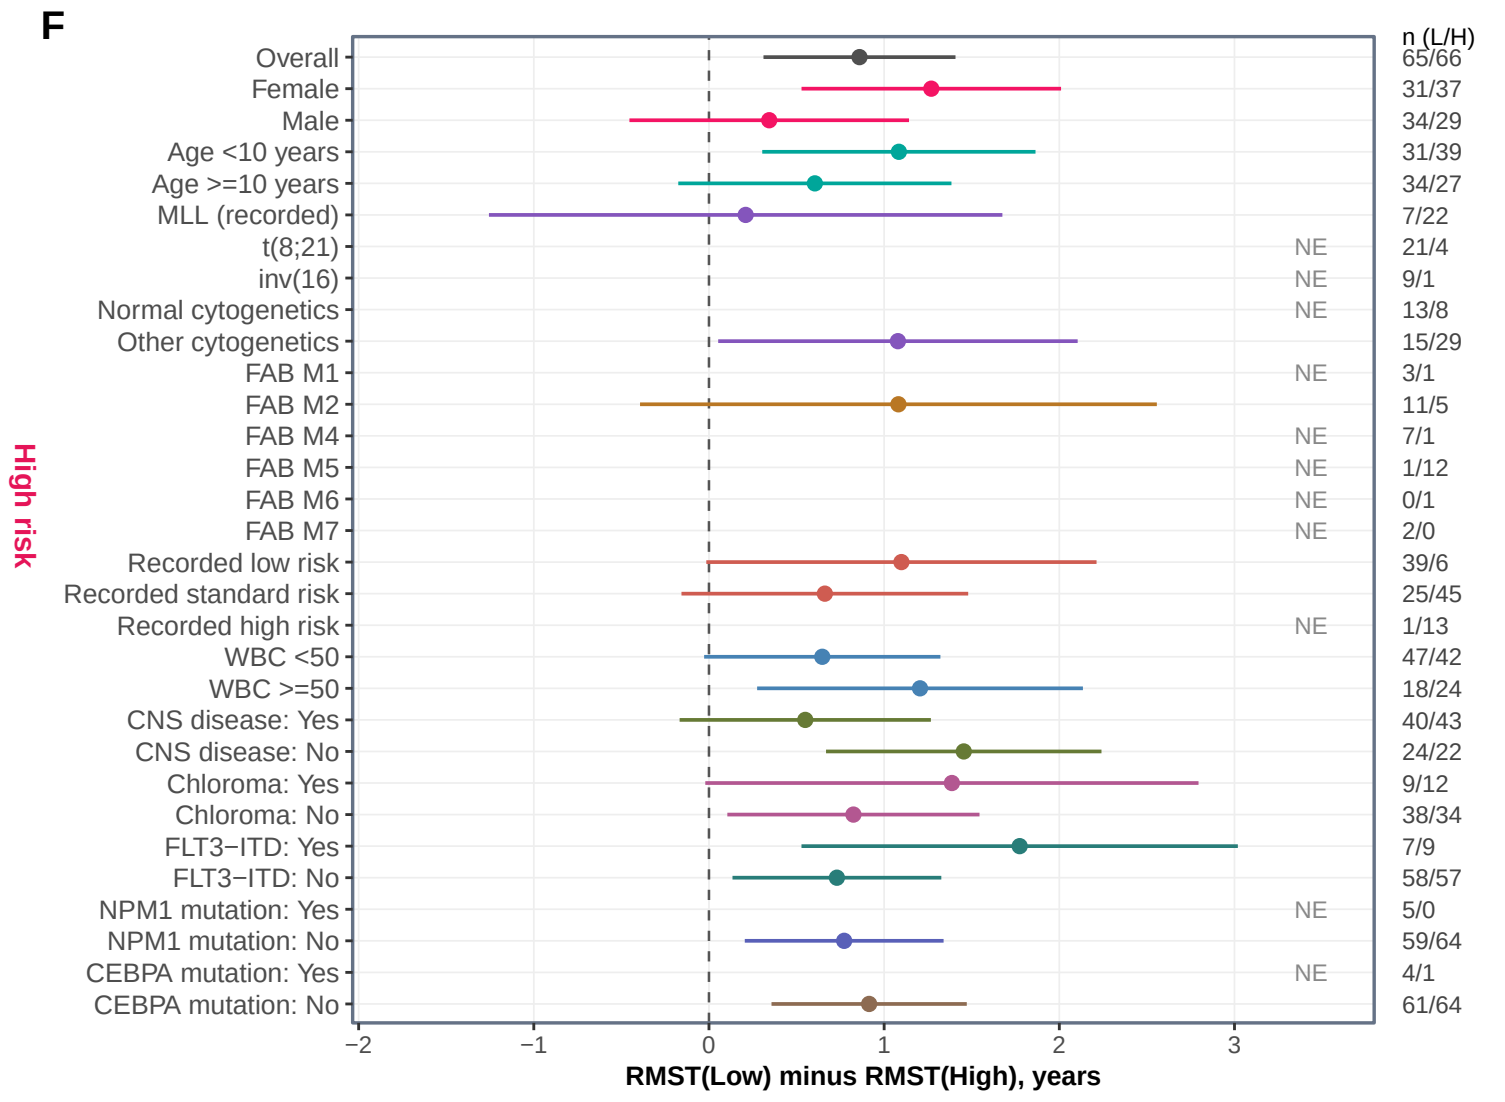


E

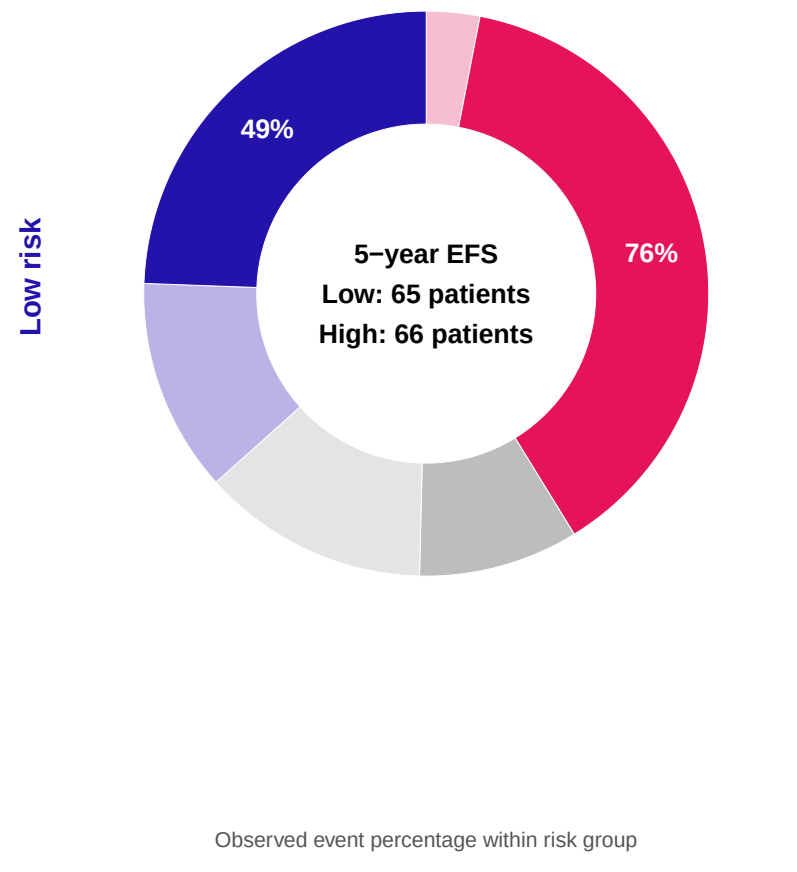


Observed event percentage within risk group

F

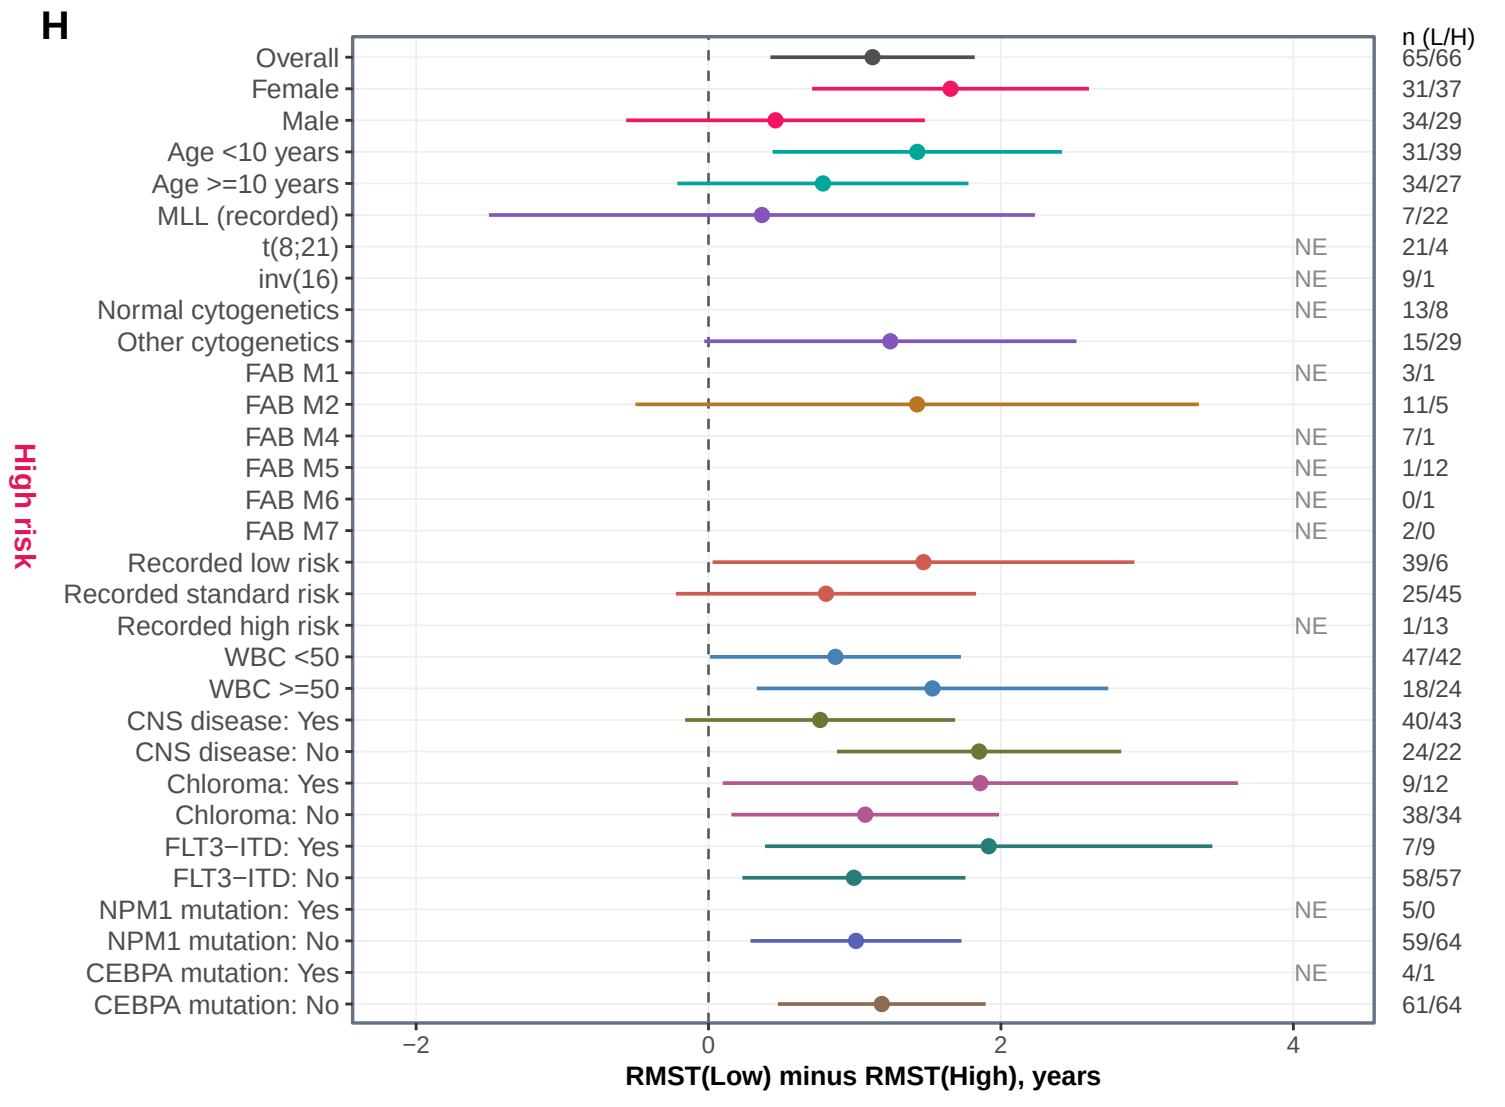


G



Observed event percentage within risk group

H



Cox EFS | 131 unique held−out Black patients | White source | Primary specimens | Three saved 70/30 splits
20,000 mRNA + 600 miRNA | Exact frozen SAT−EN pathway−analysis risks | No model refitting
Gray: early−censored / unknown. Points: low−minus−high RMST; lines: unadjusted pointwise 95% CI.
